Distribution of fees:

Section #1 - SARA Title III

Fees paid for storage or transportation of extremely hazardous substances are distributed to Local Emergency Planning Committees to aid in their preparation to respond to emergencies involving hazardous materials. These funds are critical to the continued public safety of our local communities. For more information on how the funds are used, please contact your Local Emergency Planning Committee (page 13) or contact the State Emergency Response Commission in Carson City (775) 687-6973.

Section #2 - State Fire Marshal

The fees received are used by the State Fire Marshal's office to train emergency responders to handle hazardous materials incidents and to provide information on hazardous materials to the local fire authorities. Hazardous materials training is also available to private industry. Specialized training for specific chemicals can be arranged on request. Information on hazardous materials reported on these forms is provided directly to fire departments. All fees have been established in the Nevada Administrative Code reference, numbers 477.323, 324 and 326.

For more information, please contact the Nevada State Fire Marshal's Office at (775) 687-4290.
